Computer Science Graduate with strong expertise in **Software Engineering, Machine Learning, and full-stack development**. Experienced in building scalable applications, **RESTful APIs**, and AI-driven systems. Proficient in **Object-Oriented Programming, Data Structures & Algorithms**, and modern backend development. Adept at working in **fast-paced environments**, leveraging **AI-assisted coding tools** to enhance productivity and deliver efficient, real-world solutions.

Education

Bachelor of Science (BS) in Computer Science

Institute of Business Administration (IBA), Sukkur

2020 – 2024

- Awarded **Top 10 Merit-Based Scholarship**

Experience

IT Intern — Software Development & Infrastructure

Liberty Daharki Powers Ltd (LDPL) — 235 MW Power Plant, Daharki, Sindh

- Developed and deployed the **LDPL Operations Management Portal** using React, TypeScript, and PostgreSQL, digitizing gate pass, visitor, and fleet management workflows for daily plant operations.
- Built role-based approval workflows, reporting dashboards, document generation, and operational tracking features, replacing manual paper-based processes.
- Designed and delivered a functional **CMMS prototype** as a modern replacement for the legacy MP2 maintenance management system, including equipment, work order, inventory, and reporting modules.

AI Evaluator & Workflow Testing Contributor

Turing – Remote

- Evaluated AI-generated responses and multi-step workflows across real-world desktop and browser-based environments.
- Performed testing and validation of AI agent task execution, response quality, reasoning accuracy, and usability.
- Identified edge cases, inconsistencies, and workflow failures to improve AI reliability and task completion accuracy.
- Worked on structured evaluation tasks involving user interaction scenarios, workflow analysis, and quality assurance.
- Collaborated in fast-paced evaluation cycles requiring analytical thinking, precision, and detailed reporting.

Software Engineer (Full-Stack / Backend Focus)

HealthWiz – Healthcare Management System

- Designed and implemented a healthcare system to improve patient data management and workflow efficiency.
- Developed modular backend components using **Object-Oriented Programming** and database design principles.
- Enhanced system performance through structured **database management** and optimized queries.
- Worked in a fast-paced development cycle ensuring clean architecture, maintainability, and scalability.

AI Model Trainer & Python Developer

Remotask (Scale AI)

- Trained and evaluated **Machine Learning models** through data annotation, validation, and response optimization.
- Improved model performance by applying logical reasoning and quality assurance techniques.
- Gained experience with large-scale AI pipelines and real-world data processing workflows.

Projects

DialMind – AI-Powered Emergency Assistant

2024 – 2025

- Built an end-to-end AI system using **BiLSTM-based Machine Learning models** for emergency classification from speech input.
- Developed and integrated **RESTful APIs**, IVR-based robocalls, and automated SMS notification systems.
- Designed a real-time admin dashboard for monitoring reports, logs, and analytics.
- Implemented multilingual NLP support (English, Urdu, Roman Urdu) for improved accessibility.

Human Action Recognition – UCF101 Dataset (Computer Vision)

- Developed a deep learning-based computer vision system using CNNs for action recognition.
- Implemented video preprocessing, frame extraction, and classification pipelines.
- Trained and evaluated models for multi-class activity detection.

Core Competencies

- Full-Stack Web Development, Desktop Application Development (Electron.js), RESTful API Design
- Machine Learning, NLP, Computer Vision, AI-Assisted Development (Cursor AI, Claude)
- Role-Based Access Control, System Architecture, Database Design, LAN Deployment
- Data Structures & Algorithms, Object-Oriented Programming, Agile Development

Technical Skills

- **Languages:** Python, JavaScript, TypeScript, C++ , Java, SQL, C#
- **Frontend:** React 19, React Native, Vite, Tailwind CSS, HTML5/CSS3, Recharts, shadcn/ui
- **Backend:** Node.js, Express.js, Flask, FastAPI, REST APIs, Socket.io, Prisma ORM
- **Databases:** PostgreSQL, Supabase, MongoDB, MySQL, SQLite
- **Desktop:** Electron.js (Windows + Linux), monorepo architecture (npm workspaces)
- **ML/AI:** Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, BiLSTM, CNNs, NLP
- **Security:** JWT, bcrypt, RBAC, rate limiting, audit logging, encrypted backups
- **DevOps/Tools:** Git, GitHub, Docker, Vercel, Railway, , Vite
- **AI Tools:** Cursor AI, Claude (Anthropic), ChatGPT, AI-assisted development workflows)
- **Practices:** System design, scalable architecture, test-driven development, technical documentation
